DRIVING THE WHEELS OF INDUSTRY

Scope Technologies is a leading global technology provider specialising in Mobile Resource Management, encompassing Fleet Telematics and Mobile Workforce Management. Established in 1999, Scope has emerged as an internationally recognised technology leader providing Fleet Telematics services across 37 countries with modular end-to-end solutions.

For nearly a decade, Scope's solutions have helped companies around the globe to increase the efficiency of their fleets and mobile resources, decrease operational costs and improve their profitability.

Some of the companies which have adopted the Scope solutions include Transco, ABI, BOC, Shell, Total, G4S, Holcim and DHL.

37 COUNTRIES ACROSS 5 CONTINENTS

Scope operates via an extensive reseller network, providing comprehensive end-to-end solutions to clients from a variety of industries including logistics, utilities, insurance, leasing and telecoms.

Scope's powerful technology provides an innovative, reliable alternative to those requiring mobile workforce management solutions.

Scope's technology solutions boast a powerful combination of innovation while providing reliable, enterprise class platforms. The solutions are comprised of the following categories:

- **Mobile hardware and applications** – A range of onboard vehicle Fleet Telematics units and mobile handheld workforce applications.
- **Middleware** – Centralized communication and data distribution platform providing seamless integration to third party supply chain management platforms
- **Application** - Browser based Fleet Telematics and Mobile Resource Management application.

KEY MILESTONES

- 1999** - Scope Technologies is founded.
- 2000** - Launch of Scope's first vehicle onboard hardware Telematics platform the MHub902. It is among the first of its kind to offer driver and fleet management on the same hardware platform.
 - Telenor subsidiary (the Norwegian mobile operator) becomes Scope's first international customer
 - Super Group, the South African leasing and logistics giant, orders 5,000 units for the Johannesburg Municipality.
- 2001** - Scope launches its first middleware and application platforms. Middleware the first of its kind in the industry to introduce profiled data distribution.
 - Transco (formerly British Gas) places an order for its fleet of 6,000 vehicles through its leasing arm TLG (The Leasing Group).
- 2003** - Scope launches its second generation versions of vehicle onboard hardware, middleware and applications. One of the few Fleet Telematics hardware systems to integrate the GPS Chipset directly onto the PCB, and incorporate the fleet management program code onto the GPS chipset.
- 2005** - Ituran, one of the largest Telematics Service providers in world signs up with Scope.
- 2006** - BOC chooses Scope products for its global fleet. First implementation in the UK, Hong Kong, Malaysia, Thailand and South Africa commence.
 - Scope launches its 3rd generation platform for the hardware and middleware. The new hardware platforms introduce the concepts of 5 year autonomous trailer units, least cost routing and DCT (Dynamic Customizable Triggers). The middleware introduces Fully Automated Unit Manager and 3rd party hardware integration.
 - Scope establishes Singapore office to focus on the growing Asian market
- 2007** - Scope signs regional deals with G4S for Asia and the Middle East Regions and further expands its coverage across Latin America.
- 2008** - Scope launches its fourth generation hardware range of products, including an industry specific product for the insurance market sector. Launch of the new generation MZone platform boasting a global first MRM platform using Silverlight technology.
